

# Preparing for Mission Finale

**Phase F:** *to insure the legacy of the unprecedented data collected by the Probes over more than a half of Solar Cycle 24 for the generations of researchers*

- Final adjustments of instrument calibration and cross-calibration based on the entire mission dataset
- Reprocessing all instrument datasets for the entire mission with revised calibration procedures
- Comprehensive documentation of data processing routines, calibration procedures, and chronological instrument issues
- Ingestion of all data products into NASA SPDF and JHU/APL Science Gateway
- Completion of ongoing science investigations and journal papers
- Progress on the task completion Review (6 months prior to the end of Phase F)
- Final Report on the Completion of all tasks (1 month prior to the end of Phase F)
